From the desk of the Principal

Education should not be confined within the four walls of a classroom. Rather, fruits of education should be shared at the community level for betterment of the society. It is with this intent that the Community Research and Development Cell of K. C. Das Commerce College was conceptualized and established. This Cell has been engaged in doing some capacity building works of common people, society and highlighting prospects of any society, area or village. The present work was done with the objective of highlighting the eco-tourism prospects of Rani Khamar Village of Rabha Hasong Zone which falls in the vicinity of the famous Chandubi Lake in Palasbari Tehsil of Kamrup rural district in Assam, India. I am happy to share that the present academic work output was integrated with social work activities of the institutional NSS Cell. While NSS activities were carried out in the village, inputs for the community work was also collected. The work was spread over a few months. Finally, local people were conveyed about the resources available in their vicinity for sustainable exploitation. Hope this report finds its way to the people who matters as well as desire to bring in the changes for a better tomorrow.

I would like to thank with gratitude the support and approval received from the Governing Body of K. C. Das Commerce College to carry out this piece of work. I would like to appreciate Dr. Rohit Bhattacharjee, Programme Officer, NSS Cell, student volunteers and members of the Community Research and Development Cell for believing in the objective and working in coordination.

Wish to see many more such works in future.

With regards,

Dr. Hrishikesh Baruah
